Re: SOC Analyst Internship – Summer 2027

Dear Hiring Manager,

I am writing to express my interest in a Summer 2027 SOC Analyst internship at Hiperlinx. I am a third-year Computer Engineering student at Beirut Arab University with a cumulative GPA of 3.7/4.0. I am particularly interested in security operations, threat detection and the investigation of security incidents.

Through practical cybersecurity projects, I have built a Wazuh-based security monitoring lab, analyzed Windows and Linux endpoint logs, and used Python to automate log analysis. I have also developed and tested detection rules in a controlled environment and conducted web application security assessments using Burp Suite, documenting findings and remediation recommendations.

Alongside these projects, I have explored cache-based side-channel analysis in AES through simulation. This work has strengthened my analytical approach to technical problems. I am also developing my knowledge of Azure and Microsoft Entra ID as part of my longer-term interest in cloud and identity security.

I would welcome the opportunity to contribute to Hiperlinx’s security operations team while learning from experienced professionals. I am available for a summer internship and would be pleased to discuss my qualifications and projects in an interview. Thank you for considering my application.

Sincerely,

Ahmad Farhat
